Summary

Computer Science undergraduate at VIT Bhopal (CGPA 9.11/10, graduating 2028) with Python, SQL and ML experience. Trained and evaluated a CNN image classifier on a public dataset and built skill-matching and scoring logic over job-listing data, with the results shown in user-facing dashboards. Coursework in Probability & Statistics and Linear Algebra. Looking to apply data analysis and machine learning to product and customer problems.

Education

Vellore Institute of Technology (VIT), Bhopal 2024 – Present
B.Tech in Computer Science and Engineering; CGPA: 9.11/10 *Bhopal, India*

Coursework: Probability & Statistics, Linear Algebra, Data Structures & Algorithms, Database Management Systems, Operating Systems

Technical Skills

ML & Data: Python, SQL, TensorFlow/Keras, Scikit-learn, NumPy, Pandas, CNN training and evaluation, data augmentation
Languages: Python, SQL, Java, C++, JavaScript, TypeScript
Backend & Databases: Flask, REST API design, SQLAlchemy, MySQL, Node.js, JWT/RBAC
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Tools: Git, GitHub, pull-request code review, ServiceNow (Flow Designer), VS Code
Problem Solving: 300+ problems solved (LeetCode, CodeChef, GeeksforGeeks); 100+ day LeetCode streak

Projects

AWARE – AI Waste Classification System | *Python, TensorFlow/Keras, Flask, MySQL, React.js*
- Trained a custom 3-layer CNN on the TrashNet dataset (2,527 images, 6 categories) using shear, zoom and flip augmentation, and reached 67% test accuracy.
- Served the model through a Flask backend for real-time inference and automated recommendations, with a React front end and MySQL storage.

SkillVoyage – Internship Discovery Platform | *React.js, Vite, Python, Flask, SerpApi*
- Built a search platform on SerpApi Google Jobs data with role and location search, filters, sorting and pagination.
- Implemented skill matching, an Opportunity Score, and matched-skill and skill-gap analysis, shown on a career-preparation dashboard.
- Added saved jobs, persistent student profiles and job-specific mock interview practice.

Smart Healthcare Web Platform | *React.js, TypeScript, Flask, SQLAlchemy, JWT*
- Built a platform for symptom triage, appointment booking and hospital discovery for patient and admin roles.
- Designed a REST API with JWT authentication and RBAC that keeps each role's data separate.

Experience

Open Source Contributor May 2026 – Present
GirlScript Summer of Code (GSSoC) *Remote*
- Shipped frontend features and bug fixes in 4+ repositories (React, Node.js, MERN) through maintainer code-review cycles.

Virtual Internship Trainee May 2026
ServiceNow, SmartBridge and AICTE *Remote*
- Completed hands-on training in ServiceNow workflow automation with Flow Designer and studied how agentic AI is used in enterprise service management.

Certifications

Data & ML
- Machine Learning with Python (IBM, Coursera)
- Introduction to Machine Learning Concepts (Microsoft Learn)
- Introduction to NLP Concepts (Microsoft Learn)
- Python (Kaggle)
- SQL and Relational Databases (IBM)
- Data Analytics Virtual Experience (Deloitte, Forage)
- MATLAB Onramp (MathWorks)

Cloud & Other
- AWS Solutions Architecture Job Simulation
- Cloud Computing (NPTEL)
- ServiceNow Micro-Certifications: Agentic AI, Administration Fundamentals, Flows, Automated Test Framework
- Introduction to Cybersecurity Awareness (HP LIFE)
- Java Fundamentals (Infosys)
